The Standard Book of Reference

IN placing before you a few facts concerning this well-known annual reference book, we should like to emphasize the fact of its remarkable growth, both in volume and circulation, during the past few years.

Being published annually since 1862, this work now contains nearly 2000 pages and some 300,000 entries of the principal Commercial Houses in the United Kingdom—and it is still growing!

There are only two sections: (a) Alphabetical Section, containing the names and addresses of over 100,000 Business Houses in Greater London; (b) Classified Section, covering Greater London, Provinces, and to a lesser degree countries abroad, the names of firms in each case being classified according to their trade and location—*this makes for easy reference.*

Owing to decreased cost of materials, etc., we are able to make a $33\frac{1}{3}\%$ reduction in the price of the book, which is now £1 if ordered before publication, and £1 10s. if ordered after publication. The price is net and includes delivery.

The next edition will be ready on and after 31st December.

No up-to-date reference library should be without one.

PREFACE

THIS Classified Guide has been prepared with the hope that Librarians may find it of use in the selection of Annuals, Directories and Year Books. It makes no pretence to completeness, but, it is believed, it will be found to be fairly comprehensive as it furnishes a bibliographical guide to 1700 publications in this important branch of literature.

In order to render the work of the greatest possible service, it has been divided into sections, the scope of each being indicated by the List of Contents printed on the next page.

Section I is an alphabetical subject index, giving direct reference to the actual position in which the literature relating to a particular subject, article or place may be found in the body of the book.

Section II is a classified list of 1700 Annuals, Directories and Year Books, arranged under the Dewey Decimal Classification, giving the name of publisher, price and, in the majority of cases, the month of publication, with a brief description of the nature of the contents and of the special field covered. Section III gives a list of the material grouped under the month of publication, and Section IV is an alphabetical title index.

It will be noticed that certain publications appear which are not Annuals in the strict sense of the word. These have been included for their reference value.

Finally, whilst much time has been devoted to the preparation of this book, its Compiler does not regard it as perfect, and he will welcome the co-operation of all who may be in a position to assist in promoting the usefulness of this "Guide" by providing additional particulars, and by forwarding suggestions or corrections for inclusion in the next edition, which will be published early in 1926.
